## Trends in the European Investment Fund Industry

# in the Third Quarter of 2013

This report was prepared by Bernard Delbecque and Jonathan Healy

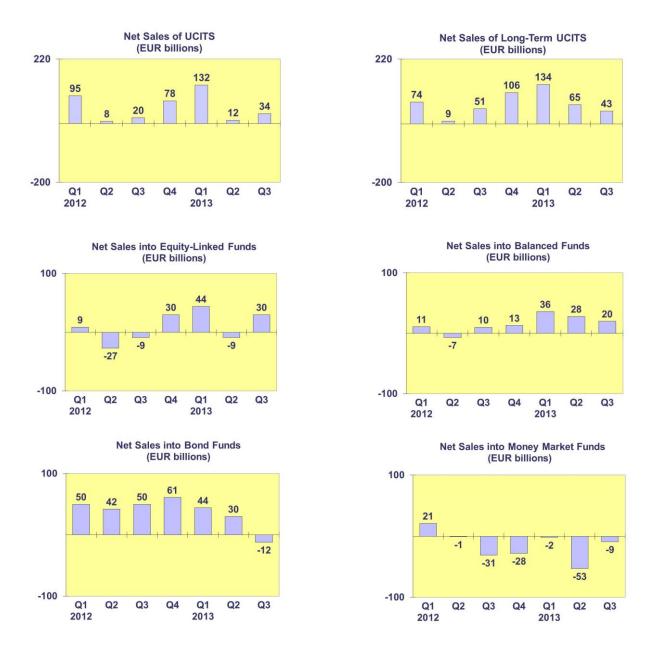

EFAMA The European Fund and Asset Management Association

Rue Montoyer 47 - B-1000 BRUXELLES - Tel. 32-2-513.39.69 Fax: 32-2-513.26.43 - e-mail: info@efama.org

### Trends in the UCITS Market Net Sales by Investment Type

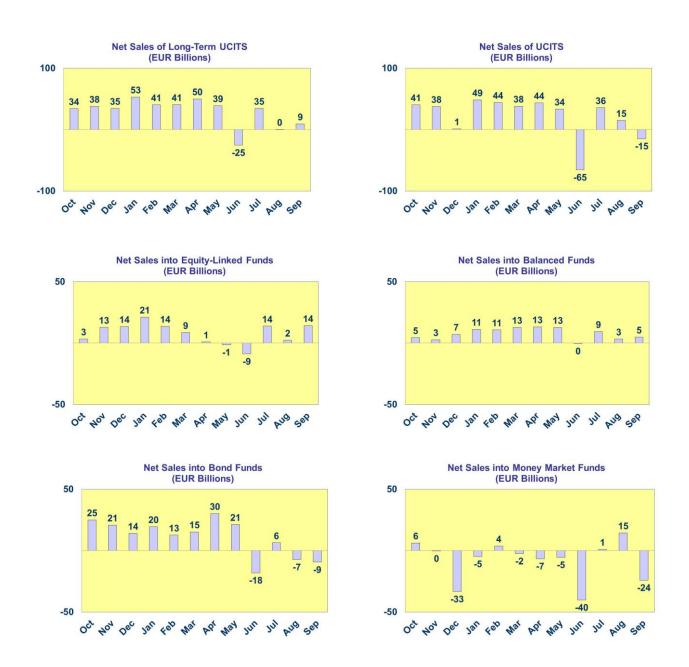

Net sales of UCITS totalled EUR 34 billion in the third quarter of 2013, up from EUR 12 billion in the second quarter. This increase in net sales can be attributed to the upturn in net sales of equity funds and decreased net outflows from money market funds. Uncertainty about bond market developments during the quarter penalized bond funds, whereas equity funds benefitted from improved investor confidence.

Long-term UCITS attracted EUR 43 billion in net new money during the quarter, down from EUR 65 billion in the second quarter. Bond funds registered quarterly net outflows for the first time since 2011 amounting to EUR 12 billion. Net sales of equity funds returned to positive territory with inflows of EUR 30 billion, compared to net outflows of EUR 9 billion in the second quarter. Net inflows to balanced funds continued to attract strong net inflows during the quarter (EUR 20 billion), albeit down from EUR 28 billion in the second quarter. Money market funds registered reduced net outflows of EUR 9 billion, down from EUR 53 billion in the second quarter.

#### Trends in the UCITS Market Net Assets by Investment Type

The third quarter was dominated by expectations of when the Federal Reserve will begin tapering its quantitative easing programme, which can be seen from the trends in monthly net sales<sup>1</sup>. Bond funds didn't really recover during the summer from Chairman Bernanke's announcement on the phasing out of the Fed's bond buying programme. Investors in equity and balanced funds gave less importance to this prospect, quite possibly because of encouraging economic data.

<sup>&</sup>lt;sup>1</sup> Differences in totals between quarterly and monthly net sales reflect differences in the universe of reporting countries.

#### **Trends in the UCITS Market** *Net Sales by Country of Domiciliation*

**Nineteen countries recorded net inflows into UCITS during the third quarter of 2013**, with four countries attracting net inflows in excess of EUR 5 billion thanks to strong net inflows to equity and balanced funds. Luxembourg led the way with net inflows of EUR 13 billion, followed by Ireland (EUR 12 billion), Spain (EUR 6 billion) and the United Kingdom (EUR 5 billion).

Elsewhere, significant net inflows were registered in Switzerland (EUR 3 billion) and Germany (EUR 3 billion). France registered net outflows of EUR 12 billion. Of the Nordic countries, Denmark and Finland attracted net sales of approximately EUR 3 billion and EUR 2 billion respectively. In the Mediterranean, Italy continued to attract large net inflows (EUR 3 billion), whilst Portugal attracted positive net inflows. On the other hand, Greece registered net outflows approaching EUR 1 billion during the quarter. In Central Europe, Poland, Hungary, Romania and Slovakia all registered net inflows during the quarter.

### **Trends in the UCITS Market** Net Assets by Country of Domiciliation

Twenty-four countries registered growth in net assets during the third quarter of 2013. Of the largest domiciles Luxembourg registered growth of 1.9 percent, France (2.1%), Ireland (2.7%) and the United Kingdom (5.5%).

In Central Europe above average growth was registered in Germany (4.6%), Belgium (4.1%), and Switzerland (3.9%). In the Mediterranean region, asset growth was recorded in Spain (6.4%), Italy (3.6%) and Portugal (3.5%). Net assets in Greece declined 6.9% during the quarter. The Nordic countries registered strong growth during the quarter with net assets increasing in Sweden by 6.4 percent, Finland (6.2%), Denmark (5.8%) and Norway (1.4%). Notable growth was also recorded in Malta (8.8%), Bulgaria (8.5%) and Romania (7.9%).

In Turkey net assets decreased 14.6 percent during the quarter. However, the Turkish Lira depreciated against the euro 9.1 percent over the period. Poland also registered a reduction in net assets (3.5%) during the quarter, whilst the Polish zloty depreciated 2.5 percent over the same period.
